Explanation of Updates

Section 242.120 has been included to remove covered formulae, **Ensure Plus HN, Choice DM, Moducal, XP Analog, and Periflex** because they have been discontinued by the manufacturer. Arkansas Medicaid is replacing the formulae with coverage of **Osmolite 1.5 Cal, Boost Diabetic**, (which is currently covered and is noted in the program manual) **Periflex Infant, Periflex Junior and Periflex Advanced**. The spelling of the names of several other formulae has been updated.

Paper versions of this update transmittal have updated pages attached to file in your provider manual. See Section I for instructions on updating the paper version of the manual. For electronic versions, these changes have already been incorporated.

If you need this material in an alternative format, such as large print, please contact our Americans with Disabilities Act Coordinator at (501) 682-6789 (TDD only).

If you have questions regarding this transmittal, please contact the EDS Provider Assistance Center at 1-800-457-4454 (Toll-Free) within Arkansas or locally and Out-of-State at (501) 376-2211.

Arkansas Medicaid provider manuals (including update transmittals), official notices and remittance advice (RA) messages are available for downloading from the Arkansas Medicaid website: www.medicaid.state.ar.us.

Thank you for your participation in the Arkansas Medicaid Program.

242.120 Enteral (Sole Source) Formulas

10-1-07

Enteral formulas are divided into several categories. Each unit of service equals 100 calories of formula. All supplies and equipment necessary to administer the nutrients in the beneficiary's place of residence, except the infusion pump and pump supply kit are included in the unit description.

A separate prior authorization must be obtained for the enteral infusion pump and the pump supply kit. The enteral infusion pump and the pump supply kit may be billed separately.

The following pages provide the enteral formula HCPCS procedure codes, any associated modifiers, code descriptions and the formula covered for each HCPCS code. The code description lists the formula included in the category of nutrients.

WIC (Women Infants Children Program) must be accessed before the Medicaid Program for children from birth to 5 years of age.

Modifiers in this section are indicated by the headings M1 and M2.
